RUPAYAN BISWAS

UI/UX & Product Designer

Kolkata, India | +91 7439504580 | rupsbiswas147@gmail.com

Portfolio | LinkedIn | Behance

Profile

UI/UX designer and final-year ECE undergraduate working across mobile and web interfaces, reusable components and interactive prototypes. Combine design leadership and internship experience with React Native implementation and developer collaboration to connect interface design with product delivery.

Design Experience

UI/UX Lead
Official Tech Team & IgniteX, RCCIIT
Oct 2025 – Present

- Translate requirements for technical and event platforms into user flows, interface layouts, dashboards and reusable design components.
- Collaborate with developers on implementation feasibility and handoff; use AI-assisted workflows for rapid prototype exploration.

UI/UX Design Intern
Future Interns
Jan 2026 – Present

- Create interface layouts and prototypes in Figma, iterating on visual hierarchy and responsive screen designs.
- Review designs with developers for technical feasibility, responsiveness and visual quality assurance.

Research Experience

Research Intern
Jadavpur University
May 2026 – Present

- Research image and video dehazing using PyTorch and OpenCV; work across model training, inference and evaluation with PSNR and SSIM.

Education

B.Tech in Electronics & Communication Engineering
RCC Institute of Information Technology
MAKAUT | Expected 2027

Skills

Design Tools
Figma, Framer

Design Methods
Interface review, information architecture, user flows, wireframing, prototyping, design systems, responsive UI

Visual Design & Handoff
Typography, composition, visual hierarchy, reusable components, developer collaboration, visual QA

Supporting Technical Skills
React, React Native, Expo, TypeScript, Tailwind CSS, Python, FastAPI, REST APIs

Teaching & Communication

Zero To Concept [YouTube]
Plan, record and present engineering lessons with structured explanations and visual notes, translating technical concepts into connected learning material.

Selected Projects

Adda247 – Mobile Experience Redesign
Interface Review | User Flows | Prototyping
Independent redesign | Case study

- Reviewed and redesigned the home, exam-selection and store interfaces around clearer content grouping and navigation.
- Reorganised these screens around a stronger visual hierarchy and documented before/after comparisons to explain the design decisions.

TechTrix 2026 – Technical-Fest Experience
Figma | Information Architecture | Responsive UI
College event design | Case study

- Designed a category-to-event-detail journey, organising event information around rules, fees and registration actions.
- Developed a superhero-themed visual system and responsive Figma layouts, balancing event branding with clear information hierarchy.

Antinorm – Skincare Storefront Redesign
UI Design | Art Direction | Visual Hierarchy
Independent redesign | Case study

- Explored a product-first storefront with restrained typography, consistent spacing and clearer emphasis on shopping actions.
- Reworked composition and product presentation to establish a cohesive visual direction across the redesigned interface.

MeteoSaarthi – Weather Intelligence Prototype
Product UI | React Native | Expo | FastAPI
Mobile product prototype

- Designed persona-aware mobile workflows for conversational weather queries, hazard alerts, monitoring bots, maps and multilingual interactions.
- Worked across product UI, React Native implementation and API integration, connecting interface designs with a functional mobile prototype.

Hackathons & Recognition

Smart India Hackathon 2025 Semi-finalist
Built **AgriSense AI**, a professional dashboard for farmers to monitor farm health using satellite data.

India Innovates Finalist
Built **Sovereign Bharata Intelligence Graph** as our team's competition entry.
